

# Time Timer® Watch

## User Guide

# GET STARTED!

The **Time Timer Watch** uses a red disk to visually depict how much time remains. As time elapses clockwise, the disk gradually disappears, helping you see and manage time more effectively.

Visit [timetimer.eu](https://www.timetimer.eu) to view our instructional video.

# STEP 1: INSERT BATTERY

## STEP 2: SELECT WATCH MODE

Time Timer Watch has 3 modes:

**Clock**

**Time Timer**

**Alarm**

Press the **MODE** button on the upper right to toggle between modes.

**Clock mode:** The Clock mode displays time of day using both a traditional analog clock face and a digital numeric display. If a Time Timer is running or an Alarm has been set, a unique icon displays on the right side of the watch face. Time can be viewed in 12- or 24-hour format.

**Time Timer mode:** The Time Timer mode includes two options: 1) Original 60-minute Timer Disk or 2) Custom Timer Disk. The Custom Disk Timer allows the disk to be scaled to represent any duration from 1 minute to 99 hours. A numeric display of time remaining is shown below the red disk. Alert can be set to audible, vibrate, both, or no alert.

**Alarm mode:** The Alarm mode can be set in 12- or 24 hour time formats. Set alert to activate alarm. Alert can be set to audible, vibrate, both, or no alert.

## STEP 3: ADJUST WATCH MODE

- 1 Press **SET** for 3 seconds to start.
- 2 The first setting will start to flash.
- 3 Press (+) and (-) to adjust time or to toggle between setting options.
- 4 Press **NEXT** to continue or **SET** to confirm and exit.

A time-out will occur after 20 seconds of inactivity.  
Press **SET** for 3 seconds to restart.

PM

Select AM or  
PM for 12-hour  
mode only

3

Select alarm:  
audible, vibrate,  
both, or no alert

## BAND REMOVAL

1

Slide lever  
inward to  
unlock band.

2

While holding lever,  
release left pin,  
then right pin.

Follow steps in reverse to replace a band.

## COMMON QUESTIONS

**Is watch water resistant?** Watch is water resistant as long as buttons are not pressed while wet. Recommended to keep away from saltwater exposure.

**How do I set a repeat feature?** In Time Timer mode only, follow step 4 and select the repeat timer option: 

**Why do my settings time-out?** A time-out will occur after 20 seconds of inactivity. Press **SET** for 3 seconds to restart.

### **What are the watch default settings?**

Clock - active state (12hr)

Timer - 15 minute (Original 60-minute Timer Disk)

Alarm - 8:00 AM (no alert)

**What is the battery life?** The expected life of the battery is approximately eight months, based on typical use. If the watch is used to time a short duration (or left running) on the repeat function with vibrating alert, then the battery life will be significantly shorter due to the higher battery requirements for vibration. If a spontaneous watch reset to original factory settings occurs, there is no backlight or a dim display, please replace the battery.

**What type of battery is it?** CR2032

## **ONE-YEAR 100% SATISFACTION GUARANTEE**

Every Time Timer® Watch comes with a 1-year warranty that covers all manufacturing and material defects. It does not cover the battery, nor the damage caused by abuse, misuse or common wear and tear.
