OPERATION MANUAL – for Pre-Set Timer TT01-XX

This system pre-set timer provides a countdown for 7, 30 or 90 days, depending on the model purchased.
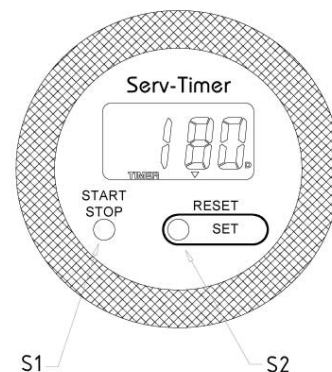

THE KEYS

S1 – Start/Stop key; Press to start countdown. Press again to stop counting.
After countdown reaches zero, press to stop aural alert, and to stop counting.

S2 – Reset key; Press to reset timer to pre-set time whilst counting is stopped.

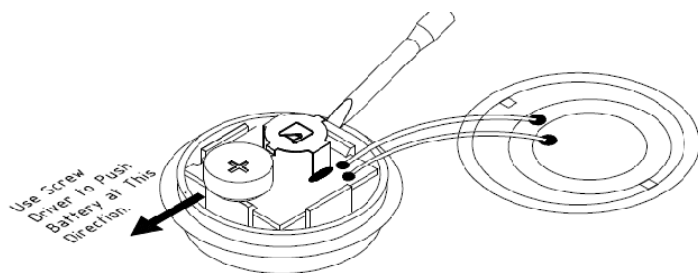

HOW TO OPERATE THE TIMER

1. Make sure the screen is displayed.
   If no display, the battery may not be installed or its power is exhausted.
   Refer to 'Battery Replacement' paragraph to install a fresh battery.

2. Press 'S1' to stop any counting if counting is observed.
   Press 'S2' to reset timer to pre-set time.

3. Press 'S1' to start countdown. Press 'S1' again to stop counting temporarily.
   Press 'S1' again to re-start counting.

4. After countdown reaches zero the aural alert is activated, i.e., beeping 6 times, then repeats
   after each 10 seconds. The timer does not stop beeping unless the 'S1' button is pressed.

5. After the aural alert is stopped, press 'S2' to reset the timer to the
   pre-set time, and start the next cycle counting by pressing 'S1'.

BATTERY REPLACEMENT

One piece of LR44 or equivalent is used. Follow the steps below to replace battery:

1. To open the back cover, use a small flat '-' screw driver
   to insert in the position of the arrow shown in Fig. b.

2. Use the same screw driver to push the battery out of the
   metal holder as shown in the following drawing.

3. Discard the old battery.

4. Insert a fresh battery into the metal battery holder (positive side up).

5. Replace the back cover. Be sure the "Made in Taiwan" mark is at the lower position.
